

Case Study

Louise Moore

The Situation: Closet Remodel

Louise Moore was ready to finish her remodel and that meant tackling the master closet. After working with Derek Manning on plantation blinds and shutters Louise asked if Barefoot & Company also worked on closets. Since she knew several colleagues who had used Barefoot & Company and had positive experiences she was very excited when Derek introduced her to Laura Barefoot.

Because Louise was planning a remodel, the closet shelving and contents had to be configured around the set size of the closet as well as an existing window in the back wall.

The Moores knew they faced some challenges with this project, mainly solving the configuration obstacles that would fit their budget. Laura quickly overcame those obstacles and was able to re-work a few things that would give the Moores the most storage possible without looking like they had cut corners-which they had not.

The Outcome: Success

The Moores are extremely pleased with the final design and colors of their closet which blend perfectly with the colors and trim of the rest of the remodel. From both a design and functionality stand point, the Moores are very happy with their new closet. Louise feels that it is attractive and also adds value to the master suite.

“I am happy to say that I can confidently recommend Barefoot & Company..”

“Customer service was terrific. I love a company that does what they say they will do. That is so important, especially for referral business. When you refer someone, your name is at risk too. I am happy to say that I can confidently recommend Barefoot & Company and know they will do a great job.”
