

## BAREFOOT & COMPANY PROTECTION OF COMPLETED WORK POLICY

**After completion of Barefoot & Co. work, the company provides the following for the purpose of protection:**

**SHEET ROCK WINDOWS:** One sheet rock window is installed at the time of window installation in order to protect the product from breakage or damage during the sheet rock process. Once the sheet rock has been installed in the house, Barefoot & Co. will return to the house install the final window in place of the sheetrock window.

**In order to protect our work after final inspection, the company requests attention to the following issues. These are issues that, historically, have been found to cause return trips that were beyond the control of the company:**

- CLEANING CREWS
  - Removing window screens, possible damage
- ELECTRICIANS
  - Scratching mirrors
- FLOORING CREWS
  - The removal of shelving, braces and poles and not re-installing the items correctly or at all
  - Removing base bumps and door bumps and not re-installing the items correctly or at all
- PAINT CREWS
  - Removing base bumps and door bumps and not re-installing the items correctly or at all
